Reporting of Sparse Infrastructure Maintenance Issues: MAINTERLOG™

Maintercept Mobile App boasts the secure geolocation based **Mainterlog™** feature, for reporting of sparse maintenance issues across company premises or any infrastructure of interest.

App Users of approved Clients, e.g., employees, students, etc., can use the **Mainterlog™** feature to report maintenance issues 24/7 at no cost!

The **Mainterlog™** functionality is secure and accessible only to App Users with authenticated company email addresses.

HOW IT WORKS

App Users download Maintercept Mobile App from Google Play or App Store.

- Click Mainterlog™ icon
- Click respective company icon
- Enter location
- Select the technical discipline
- Describe the problem
- Capture a picture
- Click Submit

The information will be received by the dedicated maintenance department/s for handling and dispatch of maintenance teams through company internal processes.

The App Users can further provide feedback via the App once the maintenance issues are resolved.

There is an option to receive detailed reports at a reasonable cost per month. This analyses hotspot areas, problem types, crew response, quality, feedback, and predicts problems, amongst other insights.

SETUP TIME & COSTS

- Setup Time: 2 Weeks
- Maintenance Reporting: FREE
- Setup Cost: R17999 (ZAR)
- Monthly Insight Reports: FREE - T&Cs apply
- Requirement: Commitment Letter

Request to report maintenance issues through the Maintintercept Mobile App

You are hereby requested to report maintenance issues through the
Maintintercept Mobile App's secure geolocation based feature -
Maintinterlog™

The **Maintinterlog™** functionality is secure and accessible to App
Users with authenticated company email addresses.

This will serve as an additional reporting avenue to the existing
company processes.

HOW IT WORKS

App Users download Maintintercept Mobile App from Google Play or App Store.

- Click Maintinterlog™ icon
- Click respective company icon
- Enter Location
- Select the technical discipline
- Describe the problem
- Capture a picture
- Click Submit

The information will be received by the dedicated maintenance department/s for
handling and dispatch of maintenance teams through company internal
processes.

The App Users can further provide feedback via the App once the maintenance
issues are resolved.

BENEFITS OF MAINTERLOG

- a) Secure and reliable technology.
 - Accessible by predefined and authenticated App Users.

- b) Identification and reporting of maintenance issues.
 - Identify existing and potential hazards.

- c) Enables quick repairs to avoid costly damages.
 - Equipment problems being detected and receiving maintenance attention before they escalate into costlier issues.
 - Recurring equipment problems being identified so that their causes can be corrected.

- d) Identifies hotspot areas to enable planning and budgeting for improvements.
 - Determine underlying causes of hazards.
 - Procure better equipment due to the information being gathered about equipment durability and performance.

- e) Employees are free reporting agents, thus avoiding expensive technical audits.
 - Listen to the concerns of workers and supervisors.
 - Personnel taking better care of equipment because regular inspections hold them accountable.
 - Monitor steps taken to eliminate hazards or control the risk.
